+Appointed December 21, 1925, in place of Charles E. Davis, resigned. Elected March 2, 1926.

Report of the Mayor

To the Citizens of Rutland:

While I might go into an exhaustive discussion of the reports of the various City departments, I shall refrain from so doing.

I consider the reports most complete and adequate in themselves.

They are each worthy of careful consideration. Such consideration of the report of any given department will evolve a very accurate picture of the activities of that department, the work accomplished and the expense of the work.

In my opinion, all of the City departments have functioned very smoothly and in a most business-like way during the past year.

Most comments which I might make would necessarily be more or less of a repetition of statements already found in the individual reports.

I would like, however, to call attention to one or two outstanding totals in the report of the City Treasurer.

The Bonded Indebtedness of the City was reduced \$62,000 during 1929.

There was also placed in the Sinking Fund the sum of \$19,546.63.

The City finished the year of 1929 with all bills paid and an item of Cash on Hand of \$40,306.79.

There is also one subject, connected with the Department of Public Works, which I think should be given careful consideration by the citizens of Rutland.

I refer to the inadequacy of our present sewer system.

The city has been growing continuously. A certain amount of work has been done each year. Much of this has been new work which was required to take care of new buildings.

Only a limited amount of repair and replacement work has been possible each season.

A very comprehensive plan was developed a few years ago for a complete sewer system on a scale to meet the requirements of present and probable future conditions. This plan has been followed during the past three years in putting in new and replacement work. All such work is therefore adequate and permanent as far as it goes.

However, there are still many long trunk sewers in which the pipe is too small to properly take care of the territory which they now serve under the present condition of increased building and population. There are shorter sections of sewer scattered about the City that are no longer adequate and with which new work should not be connected until proper replacements can be made.

These sewers will all have to be replaced eventually with larger pipes in order to have an adequate working system. It is evident that a considerable expenditure of money will be involved.

There are two ways in which this problem may be met financially.

The matter may be allowed to run along until it will of necessity have to be tackled all at once on a contract basis. It will then be a big undertaking. Bonds will have to be issued for a term of years. When the City gets the sewers, it will still be owing for them and paying interest. The work will require a season or two. The required replacements are so extensive and so scattered as to location that a large part of the City will be torn up during the time and the residents caused much inconvenience. The expense of such a forced program will be likely to be twice that of the "pay as you go" plan which I, personally, favor.

This second plan, the "pay as you go" plan, will hinge on a program of replacements and improvements extending over a period of several years. The work will be done by our local organization with local people. A yearly expense of from

\$40,000 to \$50,000 will be covered in part by an increased tax rate.

By this method, when the system is completed, the City will own it. Thereafter, expenditures will be only for such new work as will naturally arise from year to year and the regular upkeep.

There will be no debt and interest to take care of.

The replacement and improvement of many main parts of the present sewer system is something that is absolutely necessary.

The longer such a program is deferred, the more serious the situation.

It should be kept in mind that we can not increase the tax rate to such an extent that it will be burdensome to our poorer citizens.

I believe that expenses can be so adjusted and budgeted that the "pay as you go" plan can be carried out as outlined without a very material increase in the tax rate. But, if this needed work is done on the sewer system, without a large increase in tax rate, it is evident that work in some other lines will have to be somewhat curtailed. We will have to get along without some other things which, though undoubtedly desirable are not so necessary as an adequate sewer system.

The budget for the year 1930 has been made up and approved.

I feel that an effort should be made to begin work under some sort of sewer replacement plan not later than 1931.

I take this opportunity of thanking the Board of Aldermen and the heads of the various departments for their co-operation and conscientious work during the past year.

Respectfully submitted,

ARTHUR W. PERKINS,
Mayor.

Report of City Treasurer

To the Honorable City Council:

Gentlemen:—

I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1929:

RECEIPTS

Taxes received by City Treasurer	\$564,648 23

Report of Commissioner of Public Works

To the Honorable City Council:
Gentlemen:

In accordance with the provisions of the City Charter, I submit herewith, the annual report of the Commissioner of Public Works for the year ending December 31st, 1929.

ORGANIZATION

Commissioner of Public Works R. H. Royce
City Engineer R. H. Royce
Superintendent of Streets R. H. Royce
Assistant Engineer E. L. Tracy
Assistant Engineer W. K. Nichols
Superintendent of Water Works E. S. Beardsley
General Superintendent J. T. McLaughlin
Clerk T. A. Reardon

STREET DEPARTMENT

A reinforced concrete pavement 7 inches thick and 24 feet wide with concrete curbs and sidewalks was laid between Grove Street and Church Street on Library Ave. At the request of the School Board Church Street was widened on the west side between Library Ave. and Seabury Street to provide additional parking space for automobiles.

The following streets were paved with bituminous macadam. Crescent Street from Church to Grove Street, River Street from near Post Street to Forest Street, Pine Street from State Street to West Street.

On all these streets, intersections were paved to the property lines.

Considerable difficulty on Library Avenue was caused by the necessity of removing trees, stumps, an old marble wall, and on River Street by the depth of excavation where the center of the old road was much too high and much cutting had to be done.

The drainage problem was quite an item also.

Some 50 different streets had crushed gravel spread on them in varying amounts, about 7,084 cubic yards being distributed in the course of the year. This gravel was taken from a pit leased by the City from the Vermont Marble Co., south of West Street, and nearly all the gravel was run through our portable crusher. If this amount of gravel were spread 6 inches deep, 18 feet wide it would be 4 miles long.

Wherever it could be done at a reasonable expense the road was graded and aligned before applying the gravel so as to be in conformity with future improvements.

The old steam roller, bought new in 1907, was turned in for a new one, the City receiving an allowance of \$800 on the old one; and the work of scarifying and rolling the streets was greatly expedited by the exchange.

At the stone quarry on Pine Hill about 3,726 tons of stone were crushed during the period from April 10th to Dec. 12th. This stone is extremely hard, harder than trap rock in fact. Because of complaints made by citizens, the amount of dynamite used in a single blast has been reduced below an efficient minimum also because of golf playing nearby, no blasting is done after 9 o'clock A. M.

Street oiling was done as usual and about 10,000 more gallons of road oil were applied than in 1928.

Applying oil to the streets is a necessary but disagreeable operation, and we have tried to make it less disagreeable by covering with sand immediately.

In many cities the oil is left uncovered for 24 hours, to allow it better penetration, but it would seem that this is more than offset by the attendant inconvenience.

The Creek road was given a surface treatment of Tarvia and pea stone.

Clean up week was carried out again this year, and a great amount of rubbish was carted to the dump.

Patching holes in streets was done by tamping in a mixture of Standard Cold Patch asphalt and fine crushed stone, which is mixed in a concrete mixer, in an average ratio of about 12 gals. of asphalt to 1 cu. yd. of stone.

Snow removal, plowing streets and sidewalks, and sanding icy walks and streets is becoming quite an item in the annual expense.

Some years ago the snow was allowed to accumulate in the business district and finally turned into solid ice, causing much difficulty and annoyance.

If the gutters can be kept open so that each thaw automatically removes a certain amount, the ice nuisance can be largely done away with. Merchants in the business district can cooperate, if they will, by throwing the snow they remove from their walks clear of the gutters instead of choking them up, after the gutters have been cleaned in the early morning hours by City forces.

Street sprinkling and flushing was done as usual by a horse drawn flusher bought in 1921. The general results of this equipment are not satisfactory, and this year, due to no apparent fault of the driver, the team attached thereto ran away during the noon hour and damaged several cars. As the cart was full of water and very heavy it might easily have done much greater damage. It is a cumbersome, obsolete and dangerous piece of equipment, and should be replaced by a motorized flusher.

Some steel forms were bought this year for combined curb and gutter construction and were first used on Roberts Ave. This type of curb should be used on all hills where the slope is sufficient to cause scour.

Bellevue Ave. extension northerly 203.4 feet was accepted after the walks had been built and the grading done at no expense to the City.

SEWER DEPARTMENT

The following new sewers were laid.

(1) Harrington Ave.

Beginning at a point 196 feet west of the manhole at the corner of Ross St., and Harrington Ave., where work was progressing Dec. 30, 1928 (see 1928 report), thence westerly 72

feet with 8 inch pipe to a new manhole at the prolongation of the center of Crown Street.

Beginning at the end of the 10 inch pipe as laid in 1925 in front of house No. 92, thence easterly 188 feet with 10 inch pipe to the above mentioned manhole at Crown St. The 10 inch pipe is 1 foot lower in the manhole than the 8 inch, thus making sewage from Crown street flow westerly on Harrington Ave.

(2) Crown Street.

Beginning at the above mentioned manhole in Harrington Ave., thence northerly 36 feet with 12 inch pipe, thence 214 feet with 10 inch pipe to a new manhole thence northerly 200 feet with 10 inch pipe to a new manhole and the end. This sewer is on the street center-line.

(3) North Main Street.

Beginning at the point where work was progressing Dec. 30, 1928 (see 1928 report), thence northerly 90 feet with 15 inch pipe to a new manhole on the prolongation of the center-line of North street Ext.

(4) North Street Ext.

Beginning at said new manhole in N. Main Street, thence easterly 362 feet with 12 inch pipe to a new manhole, thence 200 feet of 12 inch pipe to a new manhole, thence 288 feet of 12 inch pipe to a new manhole at angle point in street, thence 166 feet with 12 inch pipe to the manhole in Bellevue Ave. This sewer now can take the sewage from the 12 inch pipe in Bellevue Ave., north of this manhole. Sewer is laid all the way on center-line of North St. Ext.

(5) North Main Street.

Beginning at the end of 10 inch pipe in front of the Houston house as laid in 1928, thence northerly 224 feet with 10 inch pipe to the end in front of the Rutland Tourist Camp. This sewer is parallel to and 30 feet east of the west line of the street.

(6) Jackson Ave.

Beginning at the manhole at the junction of the sewer from Engrem Ave., thence easterly 300 feet with 8 inch pipe to a new manhole about in front of No. 88.

Beginning at the manhole on Moon Brook trunk sewer, thence westerly 136 feet with 8 inch pipe to a new manhole, thence westerly 250 feet with 8 inch pipe to the above mentioned new manhole about in front of No. 88.

The sewage flow is thus divided to the east and west at the high point in the street. This sewer is on the same line as the old sewer which was taken up. All house drains were connected to the new sewer.

(7) Prospect St.

Beginning at the manhole in Madison St., thence southerly 100 feet on Prospect St. with 8 inch pipe parallel to the street line.

(8) Hazel Street.

Beginning at a new manhole built over the end of the 1916 pipe in front of No. 52, said manhole being 13 feet west of the east street line, thence, northerly 97 feet with 8 inch pipe crossing the travelled way to a new manhole which is $21\frac{1}{2}$ feet east of the west line of the street, thence parallel to the street line northerly 125 feet with 8 inch pipe to the end.

(9) Vernon Street.

Beginning at the manhole at the intersection of the center-lines of Adams Street and Vernon Street, thence westerly 134 feet with 8 inch pipe laid on Vernon Street, center-line.

(10) Lincoln Avenue.

Beginning at the manhole in front of No. 217, thence southerly 80 ft. with 8 inch pipe. Labor for this job was furnished by F. Manning, and the pipe was laid by the city.

(11) Lincoln Avenue.

Beginning at the north end of the pipe laid in 1914, thence northerly on the center-line of the street 76 feet with 8 inch pipe to the end of No. 258.

(12) Clark & Leonard Sts.

A sewer was laid by F. Young as follows: Beginning at the end of the Leonard St. sewer as laid by the City in 1928, thence westerly 90 feet with 8 inch pipe on the street center-line to the center-line of Clark Street, thence south 35 feet with 8 inch pipe.

(13) Chase Ave.

Beginning at the manhole on Curtis Avenue, thence south 250 feet with 10 inch pipe to a new manhole, thence 227 feet with 8 inch pipe to the end in front of No. 260. This sewer is parallel to and 22.8 feet east of the west line of the street.

(14) South Main St.

Beginning at the end of old sewer just north of Allen St., thence north 124 feet with 8 inch pipe laid directly under the east edge of the concrete pavement to the end in front of No. 176.

(15) Litchfield Avenue.

Beginning at a new manhole built over the end of the sewer on Merrill Pl. center-line as laid in 1928, thence northerly 100 feet with 8 inch pipe on Litchfield Ave., center-line.

(16) Nichols Street.

Beginning at a new manhole built over the Kendall Ave., 8 inch sewer at the north edge of Kendall Ave., travelled way, thence southerly 330 feet with 12 inch pipe to a new manhole at Burnham Ave., center-line. Sewer is on the center-line of Nichols Street.

(17) Burnham Ave.

Beginning at said new manhole on Nichols St., sewer, thence easterly 166 feet with 10 inch pipe along Burnham Ave., center-line to a new manhole, thence southerly 22 ft. with 10 in. pipe to a new manhole near the south sidewalk and over the old 8 inch Burnham Ave., sewer. At this manhole the new sewer from the Hospital, running just west of Landon's line

fence, enters. The old 8 inch on Burnham Ave., going west is plugged at the manhole.

(18) Jefferson Street.

Beginning at the manhole on Bellevue Ave., 20 in. sewer, said manhole being 7 feet north of the prolongation of Jefferson St. center-line, thence easterly 298 feet with 12 inch pipe to a new manhole at the intersection of Jefferson St., center-line with the center-line of Highland Ave., north of Jefferson, thence easterly 42 feet with 10 inch pipe to a new manhole at the intersection of Jefferson St. center-line with the center-line of Highland Ave., south of Jefferson St., thence easterly 332 feet with 8 inch pipe on Jefferson Street, center-line to the end at the center-line of Belmont Ave., south of Jefferson Street.

Twenty seven new manholes were built and 16 were repaired.

Forty five new catch basins were built and 10 were repaired.

A new sewer cleaning machine was bought this year which pulls a grab bucket from one manhole to the next, and has proved very efficacious in several sewers that have given much trouble in the past. One section of the Moon Brook sewer near Strongs Ave., was nearly half full of sludge, gravel, sticks etc., and several cart loads were taken out in a few hundred feet.

Catch basin cleaning was done by hand as formerly and the material picked up by trucks or dump carts.

Taps for new sewer connections were made, sewer stoppages removed, leaks repaired and other routine work performed.

A special committee of the board was appointed to consider ways and means for providing sewer relief.

It is well known that many of our sewers are too small to carry the quick rush of storm water that comes to them.

One of the most congested districts is in the vicinity of School, Forest and Meadow Sts. Here is a confluence of several large sewers which all try to discharge into one.

Calculations indicate that about 213 cubic feet of water per second can reach this point, and the discharge capacity of the single sewer supposed to take this is about 63 cubic feet per second at its outfall in East Creek.

It was recommended that a new 72 inch diameter sewer be laid parallel to the old sewer so as to furnish the necessary relief in storms.

As this would have to extend to Pine St. near Grimm's factory, the cost would be considerable and the board felt that before taxing the citizens for this amount it should be put to popular vote in the spring election of 1930.

Arrangements are being made with the Central Vermont Public Utility Corporations to insure that a sufficient flow of water be let down East Creek at all times to carry off readily the sewerage discharged into the Creek.

SIDEWALK DEPARTMENT

Cement concrete sidewalks regularly 5 ft. wide were built at 1-2 cost basis with the property owners and approximately 1.835 miles were laid. Work started May 23rd and finished Nov. 7th.

The appropriation this year was inadequate to complete the work done and therefore about \$1,500 was transferred from the Street Dept. funds.

GENERAL DEPARTMENT

A part of the City hall attic was partitioned off to furnish a store room for office supplies and a testing laboratory for the engineering dept.

In addition to the regular dump on the north side of River St. a dump was established for garbage and disposal of automobiles on lands belonging to the City poor farm, and a road was made into it leading south from the Gleason road.

There is a wide ravine here which with proper control should provide dumping space for a long time.

As soon as the dump at River Street is filled in to the old C. & P. R. R. track, all dumping will be transferred to the new dump, and it is expected that part of the maintenance cost will be supplied from sale of junk.

The bridge and culvert repairs this year were nominal and will continue to decrease as permanent structures replace the old ones.

The principal individual item of expense in this department was that paid to the State of Vermont for the sidewalk on Dorr Bridge.

At the time the state agreed to build this bridge after the old one was destroyed by the flood of 1927 they estimated the cost of a sidewalk as \$4,500, and said that if the City wanted it the City would have to stand the expense of it.

As there is considerable pedestrian traffic across this bridge it seemed advisable to have it built. The increase in cost was due to the raise in the cost of steel between the time of estimating and receiving bids, and also to the fact that in the original estimate the added strength of the steel and widening of abutments and approaches, necessitated by the walks was not taken into consideration.

WATER DEPARTMENT

The hydrant at the corner of Field Ave., and Grove St. was completed and 6 more set during the year.

The routine work of flushing hydrants to remove sedimentation and patrolling and testing for freezing was done as usual.

All mains laid were 6 inches or larger and 4709½ lineal feet were laid, of which 1662 feet were of 8 inch diameter.

The latter was laid on Pine St. to complete a plan that has been worked on for several years, to give better flow of water and in conformity with recommendations of the New England Insurance Exchange.

The completion of this job was an important factor in obtaining the reduced fire insurance rates which started to go into effect this year and which will reduce the premiums here annually about \$30,000.

In this same connection, work has been started in the reservoir to furnish a larger supply of water.

At present a 16 inch pipe from the reservoir supplies a 12 inch and another 16 inch which carry water to the City.

The present plan calls for a 20 inch the area of which equals the combined areas of the 12 inch and the 16 inch to be laid so as to give them a full supply.

Some time ago the water rates were lowered because not much work was being done, and what was done used too small pipes and an inadequacy of valves, thereby leaving a balance, each year.

A study showed that the rates in other cities were uniformly much higher than ours, also that there was being set aside nothing for a replacement fund when our pipes wore out. Many of our pipes were laid 60 and 70 years ago, some as much as 80, and it is reasonable to expect to replace them in the near future.

Approximately 63,000 feet of our present system of pipes are less than 6 inches and these should be replaced as soon as possible. About 400 necessary valves are lacking.

Many places now when a leak occurs it is necessary to shut down several blocks to repair it. This is a great inconvenience to users and a menace in case of fire.

In view of these and other considerations it was voted to raise the rates, and with the additional funds replace inadequate pipes and fittings with proper ones, and build up a fund that will in future years permit main replacements or emergency repairs without resorting to a bond issue.

There has always been an adequate supply of water coming down the brook that feeds the main reservoir, but sometimes in past years during a dry season, the water was low because of the porous nature of the stream bed and the dam diverting the water to the reservoir.

Last year a concrete dam was built across the brook just below the intake and during the prolonged drought this summer when many other places were bothered by lack of water we had plenty.

The lumbering operations on the water shed show a cash profit since Nov. 1st 1927 to Jan. 1st, 1930 of \$1,522.20 not including the value of cord wood on hand and some unpaid outstanding bills due.

Fifty thousand Norway Spruce were set out this year in the vicinity of Wheelerville making a total of 516,000 trees put out by the City on its forest lands since 1916.

1,000 of these trees were set out by the students in the Junior High School under the supervision of Mr. Sargent.

In line with the apparent growth of the city 102 new services were laid as against 103 in 1928, 76 in 1927 and 38 in 1926.

Precipitation data as furnished by Mr. Geo. H. Ross cooperative observer, U. S. weather bureau furnish the following data on rain and snow fall.

Precipitation (inches) for Rutland, Vt. 1929:

Month	Snow	Rain	Total Prec.
January	10.7 inches	.63 inches	1.59 inches
February	17.8 inches	.90 inches	2.13 inches
March	7.0 inches	2.21 inches	2.79 inches
April	8.2 inches	3.58 inches	4.76 inches
May		4.24 inches	4.24 inches
June		4.55 inches	4.55 inches
July		3.30 inches	3.30 inches
August		5.64 inches	5.64 inches
September		7.09 inches	7.09 inches
October		2.19 inches	2.19 inches
November	3.5 inches	2.13 inches	2.48 inches
December	12.5 inches	1.93 inches	3.52 inches
	60.0 inches	38.39 inches	44.28 inches

Following is a list of trees that have been set out on the water shed.

Year	No. and Kind	Age of trees time of planting	
1916	50,000 White Pine	4 years	
	30,000 White Pine	3 years	
1919	20,000 Scotch Pine	3 years	
	60,000 Red Pine	3 years	
1920	60,000 Norway Spruce	4 years	
	500 White Ash	3 years	
1923	30,000 Norway Spruce	2 years	
	50,000 Scotch Pine	3 years	
1924	55,000 Norway Spruce	3 years	
	25,000 Scotch Pine	3 years	
1925	20,000 Norway Spruce	3 years	
	15,500 Scotch Pine	3 years	
1928	10,000 Red Pine	3 years	Set fall of 1927
	40,000 Red Pine	3 years	
1929	50,000 Norway Spruce	3 years	
516,000			

SWIMMING POOL

In March 1929 the City voted to appropriate \$25,000 to build a swimming pool.

After considerable preliminary work was done it was decided to adopt the Bintz Type Pool plan, but a further study of detailed drawings caused a delay due to the belief that it could not be built for this amount but would cost nearer \$33,000.

\$5,000 was promised as a memorial to the late Governor P. W. Clement, and Mayor Perkins said he would furnish from personal funds the additional amount necessary to complete the pool.

The Rotary Club deeded about an acre of land on the west side of Main Street, near Tenney Brook and work was started July 1st.

More trouble than was anticipated was met in the excavation as the ground apparently had been filled with large boulders, and there was a network of underground tunnels and foundations.

After the pool wall, which was poured in one days run was completed, it was desired to settle the new fill inside by letting water stand on it for a week and several attempts were made to fill the pool but each time the water would penetrate the fill and escape thru some old subterranean passage.

It was finally decided to let the frost settle the fill during the winter and pour the concrete pool floor in the spring.

Most of the outside work has been completed and a few men are working on the inside finishing up partitions, doing plumbing, etc.

The pool is equipped with a refiltration and chlorination system which constantly pumps the water in and out and purifies it as it does so.

At the end of Dec. 1929 about \$27,500 had been spent of which about \$17,000 was for material and \$10,500 for labor.

The plumbing was done under the supervision of Mr. Beardsley, Supt. of the Water Dept. and the wiring and electrical work under the supervision of Chief Koltonski of the Fire Dept. Mr. Connors has been in direct charge of construction work.

The pool should be ready for swimming before it will be needed.

ENGINEERING DEPARTMENT

A stadia survey was made of River Street previous to the pavement construction as there was no existing street plan. The line and grade for the roadway was established on this street as well as the other streets paved during the year. The concrete curb on Library Avenue and the combined curb and gutter on Roberts Avenue were laid out and a survey was made of the proposed Royce Street curbing that has been petitioned for.

On a great many of the lesser used streets a roadway of standard width was laid out on the centerline. This was graded out by the Street Department and a gravel surface will be spread on during the winter.

All sidewalks were laid to line and grade as determined by this department.

Surveys were made and the plans are ready for the construction of two small bridges, one on Forest Street at the Moon Brook crossing, and the other on Stratton Road south of Jackson Avenue.

A detailed topographic survey was made of that part of Rotary Field fronting on North Main Street, and the plan of this was used as a basis for the swimming pool design. After the plans were completed by the designer, this department was in charge of the layout of all field work necessary for construction.

A survey was made of the Memorial Hall lot and the boundaries were marked according to Federal specifications.

A very extensive and detailed survey was made of the territory in the vicinity of East Creek and Otter Creek from West Street to the western City boundary. The map that was made of this survey was used in the study of the trunk sewer problem.

All sewer work was done according to the lines and grades furnished by this department. The "Proposed Sewer System" as worked out in 1925 was followed as closely as possible.

The annual sewer report sheet which shows the details of the location of all sewer work done during the year was compiled and the same was done for the water main extensions.

This provides a permanent record of year's work for each department.

The surface treatment of streets with oil was supervised by this department.

All City property was inventoried during the last week of the year.

Street lines and grades were given whenever requested by property owners.

Plans of private surveys of proposed streets that have been added to the files of the City Engineer include Bellevue Ave.

Ext., Howard Ave., Birchwood Ave., Wallace Ave., Deer St. Ext., and street of A. Newman.

Considerable time has been spent in the study of maps and records, and in making copies of all available maps of the Town of Mendon, preparatory to making a survey of the extensive lands of the City in that town.

The following recommendations are submitted for your approval:

In the Street Department a motorized flusher should replace the present horse drawn equipment.

I feel that no major street paving plan should be undertaken until the water and sewer mains are put in first class condition.

More curbing should be placed and the old, especially on Main St., be straightened up.

In the Sewer Department a considerable program be outlined for the replacement of inadequate sewers and a start be made this year on the proposed relief sewer from East Creek to Pine.

In the General Department, that West Street bridge over East Creek be replaced with a modern structure as soon as state aid funds are available for this, and that the following year, State street bridge over East Creek be similarly replaced.

I think there should be created the office of tree warden, the duties of which would be to look after the planting, trimming and removal of trees on City streets and Parks.

There ought to be some definite policy which will prevail uniformly from year to year adopted regarding men injured in line of duty.

In the Water Department, that the extensions of mains be kept on a revenue producing basis as much as can be and that no mains less than 6 inches be laid. That fire protection be considered an important phase of work. That only copper services be laid for house connections.

CONCLUSION

In concluding this report I wish to express to the other members of this department my sincere appreciation of the loyal support received, of the courtesy shown by other departments, and for the consideration and cooperation shown by the Board of Aldermen and by His Honor the Mayor, Arthur W. Perkins.

Respectfully submitted,

R. H. ROYCE,

Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

Rutland, Vermont.

Gentlemen:

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, twelve patrolmen, and fifty-two special officers.

297 arrests for various causes were made during the year, 16 less than in 1928, 166 were for intoxication, 49 for violation of automobile laws, 33 for breach of peace, 4 for burglary, and the balance for various other offences.

969 lodgings were applied for and given, a slight increase over 1928.

15 automobiles were stolen during the year, and I am grateful to be able to report that they were all recovered.

109 places of business were found unlocked by officers and owners notified.

The Patrol Wagon answered 169 calls in which arrests were made, and answered a total of 288 calls; in April a new Patrol Wagon was bought and we have driven it a total of 5040 miles. During the year \$168.75 was turned into the City Court account by the patrol wagon that was collected in costs.

At the urgent request of some of our citizens living on the west side of the city we started to patrol that section of the city September 1st, this work has been done by special officer Sears and the situation in that area has improved so much that I think it should be made a permanent beat for a patrolman.

In May we bought an Indian Motorcycle that has been very useful in handling traffic and answering calls, we now have a total mileage of 5066 miles on same.

In December our automatic traffic signal at the corner of Merchants Row and West Street was struck by a car and demolished. We collected \$350.23 for same and a new one was ordered at once.

An inventory of apparatus and equipment, etc., on hand shows a total of \$7,360.00.

Appropriation for 1929	\$27,970 00
Special Appropriation	1,100 00

Total appropriation	\$29,070 00
---------------------------	-------------

Expenditures:

Salaries	\$25,680 76
Expenses	3,110 98

Total	\$28,791 74
-------------	-------------

Balance	\$278 26
Credits	60 15

\$338 41 void

Recommendations:

I recommend the installation of a stop and go traffic light at State Street and Merchants Row, which would cost \$387.50, and also a stop and go traffic light at West Street and Pine Street, which would cost \$300.00. It seems to me that it is absolutely necessary that the City install these two very important traffic lights and I sincerely hope, for the best interest of the City, the Council will see fit to make a special appropriation for these two lights.

FIRE DEPARTMENT

This report contains the membership, record of alarms, the cause thereof, the value of the property at risk, insurance carried and the damage or loss as near as could be ascertained.

The Fire Department consists of one Chief Engineer, one Assistant Chief, two Captains, thirteen privates and ten call men.

The apparatus consists of two LaFrance triple combination pumping engines of 750 gallons capacity each. One LaFrance combination chemical and hose truck. One LaFrance 75 foot aerial truck equipped with a ladder nozzle to be used as a water tower. One Buick service car. During the year the Buick service car answered 21 calls that would have had to been answered by one of the larger trucks.

The Department answered 206 alarms during the year as follows:

Box, 26
Telephone, 153
Still, 23
Thermostat, 4

The value of buildings and contents endangered was \$2,047,700.00. The insurance carried was \$1,560,225.00 and the insurance paid was \$40,029.54. There was a loss of \$690.00 not insured making a total loss of \$40,719.54. (This does not include the loss on the Woolworth building as this loss was adjusted out of the State.)

When the City Council voted to meet the requirements of the Insurance Underwriters, Rutland was placed in "Class B" and a cut in insurance rates amounting to some \$30,000.00 per year was made. The Fire Department deserves some credit for this reduction as the inspectors raised their rate from "Fair" to "Good."

New pumps were installed on both pumping engines and considerable changing on the fire alarm was accomplished, work being done by the members of the Department.

Every building in the City was inspected by experts from the Underwriters and again Rutland was given credit for being one of the cleanest cities in New England. The inspectors found only two places that warranted complaint, and were refused admission at one plant. The two complaints were taken care of and on reinspection were given a clean bill. Every building in Rutland enjoyed some reduction in rates. I trust that the City Council will follow out the recommenda-

tions of the Underwriters so we can look forward to a further reduction on mercantile risks.

Recommendations:

Again I recommend that the Fire Alarm system be extended as there are several sections that are not now protected by fire alarm boxes. I would recommend that a fire alarm box be installed at the corner of Lincoln Ave. and Melrose Ave. as the nearest box to the Lincoln School is some 1,200 feet away. A box should be installed on Park Street in front of the school as the nearest box to this school is 1,000 feet away. Also boxes should be installed at Killington Ave. and Lafayette St., Lafayette St. and Charles St., Woodstock Ave. and Deer St., River St. and Meadow St., South St. and Spruce St. There are several other locations that need fire alarm protection and I recommend that the fire alarm system be extended each year and that at least three new boxes be added each year as we are penalized in our rating for lack of alarm boxes.

Also recommend that two men from the Fire Department be sent to the New York or Boston Fire College and Drill School, and the erection of a modern drill tower so the men can be properly schooled in modern fire fighting methods.

Also a new car should be purchased for the use of the Chief of the Fire Department.

Respectfully submitted,

JOHN C. FOX,

Commissioner of Public Safety.

ALFRED H. KOLTONSKI,
Chief Engineer.

Report of City Attorney

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 1st, 1929.

During the past year there have been no actions brought against the city and, at the present time, there are no actions pending in which the city is a defendant.

I have co-operated with the Tax Collector of the City in the collection of delinquent taxes and have advised and assisted him in the adjustment of several such cases.

I have also advised and counseled with the Overseer of the Poor in regard to the affairs of his department and have in several instances relieved the city of the care of poor, properly chargeable to other communities.

I have assisted the Recreation Commission in its organization and work and in the legal affairs connected with the New Swimming Pool.

With the co-operation of the Committee of citizens, appointed by the Chamber of Commerce, we have made progress in the New Postoffice—Memorial Hall transaction and the matter, after much searching of titles, objections to the right of way by the Federal Government, etc., has been adjusted to the satisfaction of all. Negotiations are now being held with the United States Attorney in Burlington for the delivery of the deeds of exchange. An effort is being made to have the work started early in the coming spring, so that we may be in line with the construction program request of President Hoover and also to relieve any possible unemployment in the city.

During the year several insane paupers have been removed, at the expense of the state, to the Waterbury Retreat, through the efforts of the Overseer of the Poor and the City Attorney, thereby relieving the City of liability.

I have co-operated with the City Police Department and the City Grand Juror in the work conducted in those two departments and have appeared for the city before the Public Service Commission in several hearings during the year.

I have, during the year, performed various routine services for the different city officials, heads of departments and their committees, such employment being part of the general work carried on in the City Attorney's office.

I have enjoyed co-operating with the various city officials and committees and very much appreciate the willing and helpful spirit with which all city officials and members of the various committees have extended to me during my term of office, and the efficiency with which the various duties assigned have been carried out.

Respectfully submitted,

CHARLES E. NOVAK,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1929:

<hr/>	
Total	\$241 15

During the past year assistance has been given to 174 outside poor families at a total cost of \$9,984.23 and an average of \$57.38. This compares with a total of \$7,834.46 and an average of \$60.73 furnished to 129 families during the preceding year.

We have had an average number of 29 inmates at the farm during the year and it cost a total of \$2,987.72 or \$103.03 to feed each. During the preceding year we had an average of 28 inmates with a per capita food cost of \$116.44. Transients to the number of 503 were given a night's lodging and supper and breakfast.

The inventory of live stock, farm implements, etc., shows a total of \$5,101.06 an increase over last year's inventory of \$4,448.27. The complete itemized inventory is filed in the office of the City Treasurer.

During the year just closed the city property at the poor farm has been kept in best condition. All buildings are in good repair. The interior was painted, papered and renovated and necessary changes in the building were made so that the male and female apartments are now separated and we feel that this was a very necessary improvement.

The poor farm itself produced all its own milk and vegetables and some of the meat required for the table. All of the labor, with the exception of \$20.00 paid for team work, was performed by the inmates.

Every precaution has been taken to insure sanitary and healthful conditions at the farm.

Respectfully submitted,

FRANK W. DIGNAN.

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report for the year ending December 31, 1929.

Temporary roofs	1

Respectfully submitted,

CHARLES G. NOYES,
Inspector of Buildings.

Report of District Nurse

To the Honorable City Council:

I hereby submit the following report as District Nurse for the year ending December 31, 1929.

Whole number of nursing visits 1,527; cared for 34 maternity cases; made 79 prenatal visits; furnished medicine, clothing and other supplies in 140 families and made 173 welfare calls. Have attended two clinics for undernourished children and in June assisted two half days in clinic work for children of pre-school age—two children have had dentistry done and five had tonsils removed.

Church Groups and Lodges have made much of the welfare work possible by gifts of money, clothing, furniture, fruits and vegetables to be used in homes where there was sickness and when the wage earner was out of employment. During the Thanksgiving and Christmas seasons 75 baskets of food and groceries were packed and sent out. Five half days of service were given the City Welfare Committee in December.

The expenses of the year for salary, transportation and supplies were \$1,332.00. Received from patients' fees \$395.00.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse.

Report of Health Officer

CITY OF RUTLAND

From January 1st to October 26th, 1929

Cases Reported:

Whooping Cough	5
Chicken Pox	32
Measles	5
Mumps	7
Diphtheria	1
Scarlet Fever	35
Typhoid Fever	13
Pneumonia	18
Erysipelas	2
Influenza	4
German Measles	2
Small-pox	1
Poliomyelitis	1

Total 127

Plumbing inspections 46

Compiled from monthly reports of Dr. George Rustedt,
Health Officer.

Report of Health Officer

To the Honorable City Council:

Since my appointment October 26th, 1929 the following contagious and infectious diseases have been reported:

Chicken Pox	12
Scarlet Fever	7
Diphtheria	2
Typhoid Fever	1
Mumps	1
Whooping Cough	1
German Measles.....	1
Plumbing Inspections	14

Water samples have been sent daily to the Laboratory of Hygiene. The returns have shown the water to be in good condition.

Three meetings of the Board of Health have been held and under their direction sixteen visits have been made, investigating sanitation in homes and stores.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Department of Public Health

Statistics for 1929 compiled from certificates filed in the
City Clerk's office.

Report of Milk Inspector

To the Honorable City Council:

Gentlemen:

I herewith submit the following report as Milk Inspector from August 7th, 1929, to Jan. 1st, 1930.

Total number of farm and creamery inspections, 469.

Total number of inspections of hotels, restaurants and stores where milk, cream and buttermilk is sold, 67.

Two hundred and ten applications for licenses were made and 203 granted, four of which have been revoked.

Two hundred and six regular and nineteen experimental milk samples, together with five water samples and were sent to the Laboratory of Hygiene, and the result of the tests have been published monthly in the Rutland Herald.

One hundred and seven sediment tests and lactodensimeter readings have been taken at farms and bottling places, and three individual herd tests were made. The large area in which the City milk supply is produced required 3,437 miles of travel, to comply with the duties of the inspector.

Respectfully submitted,

CLARE M. COLE,

Milk Inspector.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1929.

Paid the City Treasurer for 1,328 weights	\$132 80
Weighing fees	66 40
Net	\$66 40
Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge	60
Total number of weights	1,388

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Report of Librarian

The forty-fourth annual report of the Rutland Free Library for the year ending January 31, 1930.

Number of volumes in the Library Feb. 1, 1929.....	28,885
Increase by purchase	457
Increase by gift.....	95
Increase by binding periodicals.....	70
Books added from duplicate pay collection	151
Total additions	773
	29,658
Number of volumes withdrawn.....	717
Number of volumes in Library February 1, 1930....	28,941
Number of volumes rebound in 1929.....	521
Number of volumes replaced.....	105
Circulation of books, 1929.....	98,257
Circulation of books, 1928.....	97,023
Increase for 1929.....	1,234
Circulation of foreign books.....	202
Circulation of volumes of music.....	209
Number of cards issued, 1929.....	813
Number of cards issued to children.....	472
Number of books drawn on teachers' cards during 1929	15,244
Number of books drawn on club, subscription and special cards for ministers, editors, etc.....	9,700
Number of volumes drawn by children, 1929.....	27,600
Number of volumes drawn by children, 1928.....	28,193
Decrease for 1929.....	593

School circulation.....	1,695
Number of teachers' cards in use, 1929.....	200
Number of subscription cards in use.....	148
Number of volumes repaired at Library, 1929.....	946
Number of days the Library has been open, 1929....	303
Largest daily delivery, Feb. 1, 1929.....	850
Smallest daily delivery, Sept. 5, 1929.....	96
Average daily delivery.....	324
Average monthly delivery.....	8,188
Amount received from fines.....	\$562 02
Amount received from association fees.....	91 00
Amount received from subscriptions.....	35 50
Total.....	\$688 52
Number of periodicals subscribed for, 1929.....	66
Number of periodicals received by gift.....	74
Total.....	140

CYNTHIA M. GORTON,
Librarian.

LUCY C. BURDITT,
Treasurer.

I have examined the above statement and found it correct
as stated.

L. E. CHALMERS,
Acting Auditor.

Report of Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

In submitting our report for the fiscal year ending December 31, 1929, we wish to bring to your attention one fact. If you will refer to previous reports you will find a great deal of emphasis is laid upon the overcrowding of the schools, especially in the higher grades. We are glad to say that no such complaint will be made in this report. We have had the use of our new High School building for one whole school year and find the whole school system is functioning smoothly due to the adequacy of the school plant. It is pleasing to report that the school children of Rutland are now able to secure the training necessary to fit them to enter life on equal terms with children from other cities.

In this report we wish to bring to your attention the cost of operating the schools of the city. One would expect the cost of maintaining the schools to increase somewhat each year because the general cost of living tends to increase even though the cost of certain commodities may decrease. Each year the family demands more and gets more and of course pays more for meeting those demands. As in families, so in schools.

In the past nine years our enrollment has been increased by 500 pupils and 300 of these came in during the past three years. This fact alone accounts for a great deal of the increase in the school budget. Our budget for 1930 calls for an increase of \$23,354.20 over the budget of 1921 for the instruction alone of these additional pupils. During this same period the increase in cost for the improvement of instructional service through better salaries to teachers is \$19,070.00. The Board of School Commissioners is helpless to prevent these increases because new pupils must be provided with instruction and our salary schedule merely reflects general conditions throughout Vermont and New England.

The fact that we have a new High School plant accounts for a little over \$6,000.00 of the increase in operation of plant. It has been the policy of the Board for some years to carry on a progressive program for the improvement of buildings and grounds and to make them better serve the purposes of education. Last year we developed the grounds, laid sidewalks and built a driveway and track at the High School. We propose to put in side walks and curbs at two buildings this year and completely repair and improve the Madison Street School. Our electrical and telephone service cost \$740 in 1921, and in 1930 they are estimated to cost four times that amount. Our insurance premiums now are three times as great as in 1921. The increased enrollment and the desire to give better instructional service has made it necessary for us to increase our appropriations for books, instructional apparatus and furniture from \$8,855 in 1921 to \$16,208 in 1930.

The foregoing will give you some idea of how the expenses have been increasing and since the income does not increase in the same proportion it will be necessary for the Board to ask for an additional tax of ten cents on the dollar of the grand list. During the past three years it has been necessary to ask the voters for thirty cents on the dollar of the grand list in addition to the eighty-five cents authorized by the Charter and this year it will be necessary to ask for forty cents for the current expenses if we are to maintain that high degree of efficiency which we believe all citizens will desire.

For some years the Board of School Commissioners has felt some anxiety regarding the safety and economy of operation of the heating plant at the Meldon School. The boilers are small, poorly located and need constant attention and repair. It has been necessary to patch two of them recently and we have been repeatedly advised that they may break down any time. Since it costs over \$200 a day to operate this school, a breakdown during the school year would mean a serious loss to the city. About eight months ago the Board employed a competent heating engineer to make an investigation regarding this heating plant and advise the Board what,

in his opinion, was the best policy. That investigation has been made and the engineer advises that we install new boilers in a new boiler room to be erected outside the building.

When it is considered that the boilers at present are located under the stairs and main exits from the building, the removal of the heating plant to a boiler room outside the building would eliminate a serious fire hazard. The construction of a boiler room and coal pockets outside the present structure would not only do away with this hazard but would remove objectionable dirt and obnoxious gases from the building and provide additional space for school purposes. It would also permit the use of hard coal in place of soft coal and thereby cease to be an annoyance to the neighborhood. This plan will mean the voting of an additional tax of ten cents above the forty cents required for current expenses but we believe it will meet with the hearty approval of all the voters, especially those who now have, or will have, children attending the Meldon School.

We will, therefore, ask the voters to approve, at the March election, a tax of forty cents on the dollar of the Grand List above the eighty-five cents limit allowed by the Charter to meet the current expense of the schools and an additional ten cent tax for a new heating plant at the Meldon School.

In spite of the increased expenses as outlined above, the Board wishes to assure you that we are spending the money intrusted to us economically with due consideration of costs but with greater consideration for the needs of the children. The citizens have expressed by their votes their confidence in the Board of School Commissioners and their desire to have the best educational facilities possible and we hope their confidence will continue.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,

By LATHROP H. BALDWIN, Pres.

Rutland, Vt., February 3, 1930.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Alderman and the Citizens of the City of Rutland:

I have the honor of submitting to you the thirty-seventh annual report of the Rutland Public Schools and the ninth under the present administration.

The schools in every community have found it necessary to make changes in the subject matter offered to young people and to alter the methods of presenting such subject matter. The changes in the way of living and in the ways of making a living have become so marked that the schools, to meet the need for which they were designed, find it imperative to be on the alert to discover need of readjustment. We desire to make the educational process a thrilling adventure for today with a reasonable assurance that young people will be fitted for a better tomorrow.

The improvement of instruction in the class room is the ultimate objective of every change in our educational program. The persistent demand for teachers better qualified for their task, the effort to secure better buildings and equipment, and the desire to improve every service rendered by the schools is made because of the certainty that these things have a potent influence on effective instruction. Too much faith has been put in mere academic learning, the repetition of facts without thought, while too little attention has been given to character, poise and manners. Beautiful and clean school buildings and grounds have a decided influence on behavior.

During the past fifty years the public has demanded that the schools assume more and more responsibility with respect to the education of children. These demands have been natural and, in most cases, justified because of the fundamental changes in living conditions. Modern means of transportation and communication alone make safety instruction imperative. But the

demands upon the time and resources of the schools have been so numerous that there is a tendency to dissipate energy and reduce accomplishment. To overcome this tendency we are seeking to integrate subject matter so that nothing important shall be omitted and so that confusion will be avoided. A list of the subjects offered in the elementary schools of Rutland fifty years ago, twenty-five years ago, and now, indicates the necessity for a recombination of subject matter.

SUBJECTS OFFERED IN THE ELEMENTARY SCHOOLS OF RUTLAND

1880	1905	1930
Reading	Reading	Reading
Spelling	Spelling	Spelling
Arithmetic	Writing	Handwriting
Writing	Arithmetic	Arithmetic
Geography	Geography	Geography
Natural History	Nature Study	Natural Science
	Language	Language
	Drawing	Drawing
	Music	Music
	Physical Education	Physical Training
	Physiology	Hygiene
	History	History
		Civics
		Supervised Play
		Safety Education
		Character Education

The six subjects of 1880 have been replaced by sixteen in 1930. Few will deny the necessity of including all of the sixteen subjects but the capacity of children and the limited amount of time available indicates that a new arrangement of subject matter is greatly to be desired. We have combined geography, history, and civics into one field, social science, which after three years of use seems much superior to the old arrangement. Just now we are attempting to combine reading, spelling, handwriting and language into one general language field. It has been found that handwriting can best be taught

in connection with spelling and language and that spelling, to function, must be taught with language. Our physical education includes hygiene, physical training, supervised play and the recess periods. Safety education and character training are given full and satisfactory attention in connection with social science, the language, and physical education groups. The full program for the first six grades may, in the near future be included in six general and related fields:

Language (including reading, spelling, and handwriting)
 Social Science (including history and geography)
 Arithmetic
 Drawing
 Music
 Physical Education

Necessary adjustment in regard to subject matter has been easiest in the junior high school. This is a new unit in the school system and is less hampered by tradition. We find it possible to give instruction in the ways of healthful living, to give practice in the elements of citizenship and to make preparation for a wise use of leisure so that the young people will be more and more a social asset. The junior high school grades of Rutland are now provided with a building in which many of the best elements of a satisfactory school experience can be made available.

The senior high school unit has been more hampered by tradition than any other public school unit. This is a natural situation because preparation for college is involved and we have been timid about being accused of "lowering the standards" of education. Under the progressive leadership of Principal Leslie O. Johnson and an energetic faculty, the Rutland High School curriculum has been so improved and varied that each child in the school finds four years of successful effort rewarded by satisfactory achievement.

William John Cooper, United States Commissioner of Education, has appointed a special committee to study the field of secondary education in order that needed changes in high

school education may be determined. Several other public and private agencies are at work on the same problem. It is safe to assume that when the results of these studies and investigations are made public we shall be on the way to a solution of a difficult problem.

I am glad to report that the splendid public support accorded the schools, reinforced by the diligent effort of the Special Building Committee and the Board of School Commissioners, has made possible suitable accommodations for all the children of the city. I am sure that every citizen is happy in the thought that modern and adequate facilities are now being provided.

You will find, by a study of the statistical report of the Board of School Commissioners, that our school population is growing, that your money is wisely spent and that your interests and property are being safeguarded. We look forward to another year of successful enterprise for the young people of Rutland.

Respectfully submitted,

W. W. FAIRCHILD,

Superintendent.

Rutland, Vermont, February 7, 1930.

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners from January 1, 1929, to December 31, 1929, inclusive, and we hereby certify that, in our opinion, they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The books and records of the City Treasurer's office are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1929, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE T. TOWER,
JOHN W. BURKE,
GEO. A. SABIN.

City Auditors.
